I refer you to this list of Limits in Notes.... Specifically 21509 Paragraphs seems to be the MAX
Posted by Bill Ernest on 15.Apr.04 at 11:57 AM using Lotus Notes
Category: Applications Development   Release: 6.0.3   Platform: Windows 2000

Credit given to Mike Woolsey for assembling this List.

Limit	R5 (LotusScript 4)	R6
What is the maximum size of a database?	64 GB (gigabyte) or the OS file system's limit (2 GB on some older UNIX platforms)	64 GB (gigabyte) or the OS file system's limit (2 GB on some older UNIX platforms)
What is the maximum size of plain text fields? (What is the maximum size of a group Members field?)	15KB per (summary) text field; 30KB of fields per document (storage); 15KB displayed in a view's column	15KB per (summary) text field; 30KB of fields per document (storage); 15KB displayed in a view's column
What is the maximum size of a computed text field?	?64,363 characters	?64,363 characters
What is the maximum size of a single paragraph in a rich text field?	64KB (this is approximately 35k of text, though)	64KB (this is approximately 35k of text, though)
What is the maximum number of paragraph styles?	64,000 *unique* paragraph styles in a single document	64,000 *unique* paragraph styles in a single document
How many sublevels in a hierarchical view; how many documents at each level?	31 levels; 300,000 documents	31 levels; 300,000 documents
What is the maximum number of windows you can have open simultaneously?	limited by memory; 35 (?) accessible from keyboard	limited by memory; 35 (?) accessible from keyboard
How many characters are allowed in names for views, forms, and so on?	Database Title: 32 Filename: limited by OS's file system Field names: 32 View names: 64 Form names: 32 Macro names: 32	Database Title: 32 Filename: limited by OS's file system Field names: 32 View names: 64 Form names: 32 Macro names: 32
How many aliases are allowed for views?	Up to 130 characters for all view aliases per view, including vertical-bar separators ("|"),	Up to 130 characters for all view aliases per view, including vertical-bar separators ("|"),

	including the view name	including the view name
What is the maximum size for Mail recipient names?	2MB of recipient names (based on fully qualified names, for example, *Les Kaplan @ Marketing*).	2MB of recipient names (based on fully qualified names, for example, *Les Kaplan @ Marketing*).
How many mail rules in a mail DB?	50	100
What's the maximum password length allowed on an ID?	63 characters	63 characters
fields in a database	~ 3000 (limited to ~ 64K total length for all field names). You can enable the database property "Allow more fields in database" to get up to 22,893 uniquely-named fields in the database.	~ 3000 (limited to ~ 64K total length for all field names). You can enable the database property "Allow more fields in database" to get up to 22,893 uniquely-named fields in the database.
How many fields in a form?	10MB memory (6MB memory for OS/2)	10MB memory (6MB memory for OS/2)
columns in one table	64	64
rows in one table	255	255
views in a database	No limit; however, as the number of views increases, the length of time to display other views also increases	No limit; however, as the number of views increases, the length of time to display other views also increases
forms in a database	Unlimited	Unlimited
columns in a view	289 ten-character columns; dependent upon # or characters per column	289 ten-character columns; dependent upon # or characters per column
How wide can a column be (# of inches)?	?15KB displayed in a view's column (5.0.3 release notes)	?15KB displayed in a view's column (5.0.3 release notes)
What's the largest view column title allowed?	50 characters	80 characters
What is the total size of computable simple text fields?	63K	63K
How many paragraphs in a document?	21,509 (19,004 for OS/2)	21,509 (19,004 for OS/2)
What is the maximum size of a rich text field?	Limited only by available disk space up to 1GB	Limited only by available disk space up to 1GB
What is the maximum number of inserted page breaks?	Unlimited	Unlimited
How many documents can be imported into a view?	?(the original (col. 2) has something wrong, syntactically, maybe it's) Individual documents: up to 350K; from a spreadsheet, 8192 rows; 5000 separate	?(the original (col. 2) has something wrong, syntactically, maybe it's) Individual documents: up to 350K; from a spreadsheet, 8192 rows; 5000 separate

	documents	documents
cascading views in a database	200	200
How many copies of a document can be printed at once?	65,535	65,535
What is the maximum value allowed in "Start page numbers at" field?	65,535	65,535
margin size (in inches)	46	46
page cropping size (in inches)	46	46
point size to select/print	250	250
maximum number of soft-deleted documents in a database	1000	32,768
documents in a view	Maximum of 128 GB for a view index. (16 Mpage of B-tree space, 8kB/page) Also limited by available disk space (2 GB on some UNIX platforms). View containers in R5 databases (ODS 3.1 up) do not have a container size limit. The view size limit is now determined by the maximum number of pages that can be created which is 16,777,214. A page holds 8 KB so that means the maximum size for a view is 137,438,937,088 bytes (128 GB).	Maximum of 128 GB for a view index. (16 Mpage of B-tree space, 8kB/page) Also limited by available disk space (2 GB on some UNIX platforms). View containers in R5 databases (ODS 3.1 up) do not have a container size limit. The view size limit is now determined by the maximum number of pages that can be created which is 16,777,214. A page holds 8 KB so that means the maximum size for a view is 137,438,937,088 bytes (128 GB).
What's the maximum number of profile documents allowed in a database?	6000-6100 per database : s/w limitation	around 6000-6100 per database: s/w limitation
What is the maximum number of documents that can be exported to Tabular Text?	Limited only by available disk space	Limited only by available disk space
How many levels of responses will display in a view?	31 levels of response to 1 main document	31 levels of response to 1 main document
How many responses per parent document?	(bug:15,796 responses per document in R5 to 5.0.10)	??
What is the maximum number of entries in an Access Control List?	950 names (I don't know if this has changed at all)	950 names (I don't know if this has changed at all)
What is the maximum number of roles in an access control list?	75 Roles	75 Roles
What is the maximum	4096 5.0.9 up (pre-	4096

number of ACL groups a user can be member of?	5.0.9, a bug may crash server over 3000 groups)	
What is the maximum number of groups that can be nested?	20 levels or up to 64k of group name and person name characters, whichever is lower (~30k of data using @UserNamesList or @UserRoles) (in R4: 6 levels)	?20 levels or up to 64k of group name and person name characters, whichever is lower (~30k of data using @UserNamesList or @UserRoles)
What is the maximum size of a single paragraph you can cut or copy to the Clipboard?	Unlimited (64K for UNIX)	Unlimited (64K for UNIX)
What is the maximum number of documents you can cut or copy to the clipboard?	2335 (Win32)	2335 (Win32)
What is the maximum number of users to have authorized passwords on a multiple password ID?	8 users	8 users
What's the maximum amount of storage that can be used for strings in a LotusScript module?	2 GB or available memory.	2 GB or available memory.
What's the maximum length of an environment variable value?	255 characters	255 characters
What's the maximum length of a string constant in @function formulas?	~2k characters	~2k characters
What's the maximum number of results that can be returned from a full text search	4,999	4,999
What's the largest URL HTTP will accept?	1024 (2048 5.0.10 up)	2048 (?)
What's the largest richtext field HTTP will update?	~64k?	~64k?
What's the maximum size of variable-length strings in a LotusScript module?	2 GB (1 GB of characters) per module, or available memory.	2 GB (1 GB of characters) per module, or available memory.
How many variable-length strings can be defined in LotusScript?	Limited by available memory and module definitions. Can be limited by symbol table to 64k of symbol names per module.	Limited by available memory and module definitions. Can be limited by symbol table to 64k of symbol names per module.
What's the maximum size of fixed-length strings in LotusScript?	64k (this is a BASIC language limitation)	64k (this is a BASIC language limitation)
What's the maximum	32k (16k characters)	32k (16k characters)

length of a string literal in LotusScript?	(this is a BASIC language limitation)	(this is a BASIC language limitation)
What's the maximum line length of a line written by LotusScript Write statement?	255 characters	255 characters
How many characters can be in *path* in MkDir, RmDir, or ChDir statement?	128. This includes the drive specifier, if any.	128. This includes the drive specifier, if any.
How many items can be in a Print, Write, or Input statement?	255	255
What's the maximum *recLen* in Open statement?	32767	32767
How many symbols can LotusScript handle?	64k of text in symbol names	64k of text in symbol names
How many data elements can be in a LotusScript array?	Determined by memory available for data, and by the storage size of each element of the array, which varies with the array data type. For example, a Long one-dimensional fixed array declared in type scope can have 16,128 elements. (The total storage size available for fixed-size data in module scope is 64K bytes, and a Long element requires 4 bytes for storage.)	Determined by memory available for data, and by the storage size of each element of the array, which varies with the array data type. For example, a Long one-dimensional fixed array declared in type scope can have 16,128 elements. (The total storage size available for fixed-size data in module scope is 64K bytes, and a Long element requires 4 bytes for storage.)
What's the maximum size of a LotusScript executable module's code?	limited by available memory; 64k of source without LSS include files	limited by available memory; 64k of source without LSS include files
How many outline entries can an outline have?	~21,000 entries	~21,000 entries
How long can a remote -console command be, and still display properly in Administrator?	77 characters. Some commands may handle more; others don't. The command itself is neither displayed nor logged as more than 77 characters.	More than 77 characters (documented as "addressed" in K-Base, but no new maximum value is documented).
